

Presentation

Instructor: Mehrdad Nojournian
Course: Secret Sharing Protocols

Deadline for Topic Selection: Feb 28
Presentation: Last Classes in April

For the presentation, you should prepare 20 slides and present your project's result to the class in 20 minutes (followed by discussions). The presentation must have the following structure:

1. Contents of Your Talk.
2. Problem Statement and Contributions.
3. Preliminary Materials/Background.
4. Main Body/Content.
5. Concluding Remarks.

The students who have registered in the **in-person** section must present their research in the class during April. **Online** students can **either** come to the class in April and present their research to the class **or** prepare a 20-minute video-slide (your slides & voice must be clear). Online students must also submit their videos (just the link) to the related assignment section on Canvas. If you decide to prepare a video-slide, it must have the following components:

1. After introducing yourself, you must illustrate the contents of your talk (2 minute).
2. You then talk about contributions of the paper(s) & background materials (~5 minutes).
3. Subsequently, you must present the main body of the paper(s) (~15 minutes).
4. Finally, you should provide a short summary/concluding remarks (3 minute).

Please speak loudly and clearly. Here are some video recording options:

- Screenr <http://www.screenr.com/>
- Screencast-o-matic <http://www.screencast-o-matic.com>
- Jing [http:// www.techsmith.com/jing/free/](http://www.techsmith.com/jing/free/)
